

SharePoint Art of the Possible

May 12th, 2008

The logo for 'ascentium' is located in the bottom right corner. It features a blue wavy graphic that spans the width of the slide, with the word 'ascentium' in a dark blue, sans-serif font. The 'i' in 'ascentium' has a small dot above it.

Who is Ascentium?

Ascentium is an integrated technology and marketing consultancy with a proven track record of building interactive online solutions and applications that achieve exceptional returns.

Blended Solutions

- Marketing & technology integration to boost our customer's top-line growth
- Services span from strategy to demand generation, collaboration to infrastructure
- Solutions tailored to customers' unique business challenges

Dynamic, high growth company

- Privately owned corporation founded in 2001: CAGR – 95%
- Inc 500 list 2005-2007; PSBJ Fast 100 2004-2007
- 2007 \$54M Revenue and 500+ people; projecting to double this in 2008 to \$100M & 1000 people
- Successfully acquired 8 companies since 2001 with 120 total employees
- Acquired four companies in 2007: CenterLogic (Portland), Invoke Systems (Baltimore), Miller White Runkle (Spokane, Atlanta), Artemis (London, UK)
- 10 Offices in: Northwest, SouthWest, SouthCentral, Mid-Atlantic, Public Sector, EMEA

Strength in Execution

- 500+ employees with deep expertise
- Microsoft Gold Partner with 7 Competencies
- 6 Microsoft early adopter programs and 4 Partner Advisory Council memberships
- Agile methodologies tailored to customer needs
- CMP VAR Business – Top 500 Technology Integrators in 2007
- 3 WW Microsoft CRM 'Pinnacle' awards in the past two years
- Deep expertise in CRM, BI, Search, Collaboration, Portals, ECM, Interactive Marketing as well as application & custom development and infrastructure
- Microsoft awards including FY '06 West Region Partner of the Year for Teamwork, FY '07 PacWest GM, Marketing and Competencies, FY '08-Q1 Northern Area GM Award for Partner Excellence

Accountable Partner

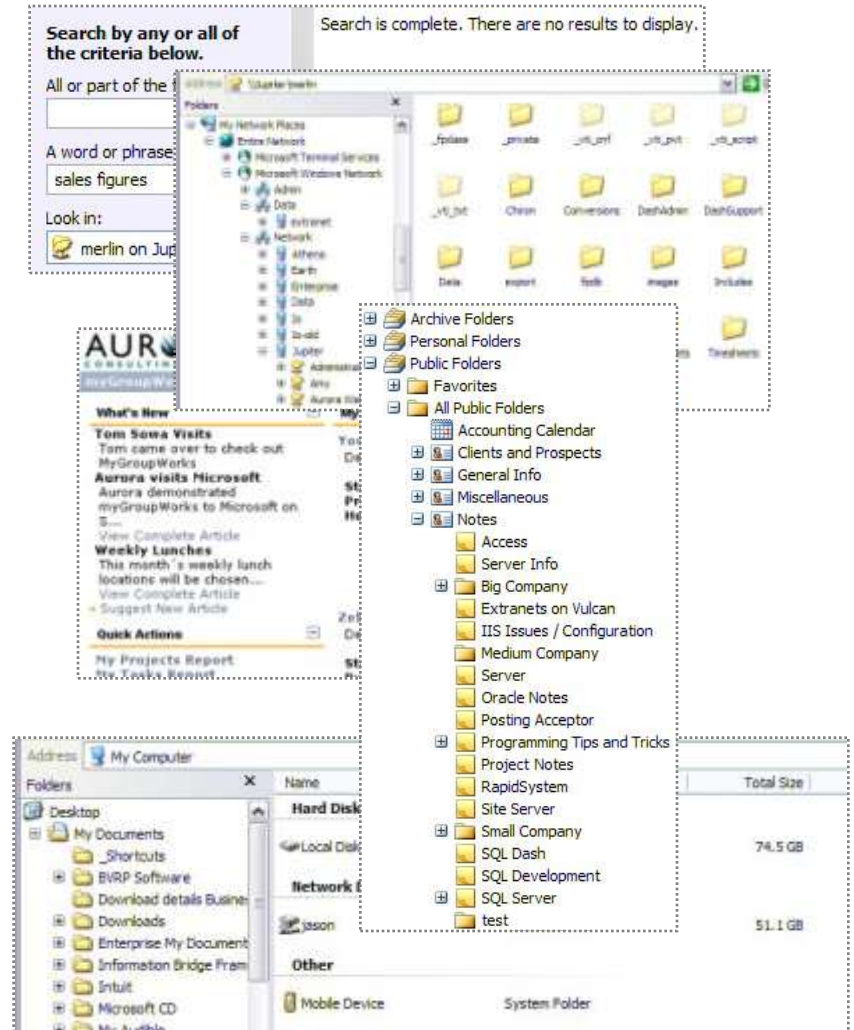

- Committed to results over the life of customer's investment driving incremental results from incremental investments
- Dedicated to long-term customer loyalty
- Strong and extensive partnership with Microsoft and top-tier Microsoft National System Integrator

Business Challenges

Organization of Information

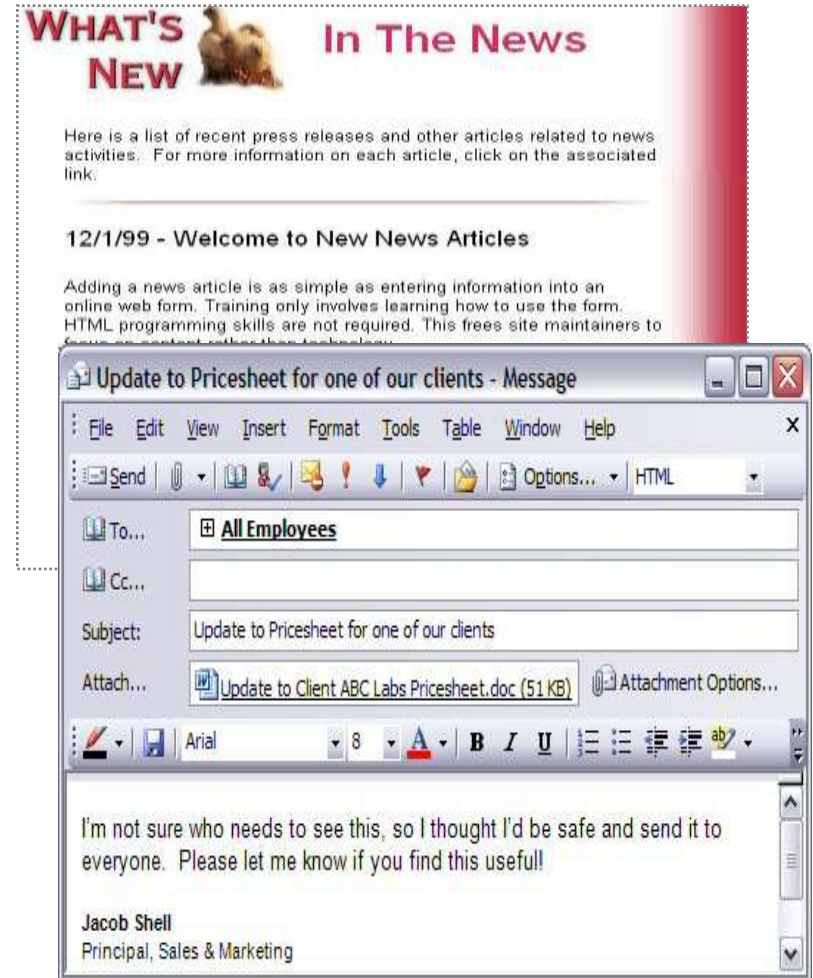

- Information structures are nonsensical and scattered
 - File Server Shares / Public Folders / Intranet Sites / Personal Hard Drives
- Can't find what you KNOW is out there
 - All or Nothing Endeavor
- Can't discover what you DON'T know is out there
- Accessing the right information
 - Users require information in different systems

Business Challenges

Dissemination of Information

- No one knows what's new
 - Job-Critical Information / Corporate News / Events
- Notifications are Problematic
 - Need to be notified about the things you care about
 - Typically get notified on everything and anything
- What *is* available becomes stale
 - Content recreation occurs
 - Users lose time

Business Challenges

Team Collaboration

- Long-term projects
 - Content Collaboration
 - Event Planning
 - Campaign management
 - Project Management
- Office / Franchise Geographies
- Centralized Access

Manual approval processes

Introduction to SharePoint Server 2007

Microsoft Office SharePoint Server 2007 is an integrated suite of server capabilities that can empower business users to:

➤ Simplify internal and external collaboration

- Enhance customer and partner relationships.
- Provide Ubiquitous Enterprise Search.
- Work when and where you want.
- Personalize operations.

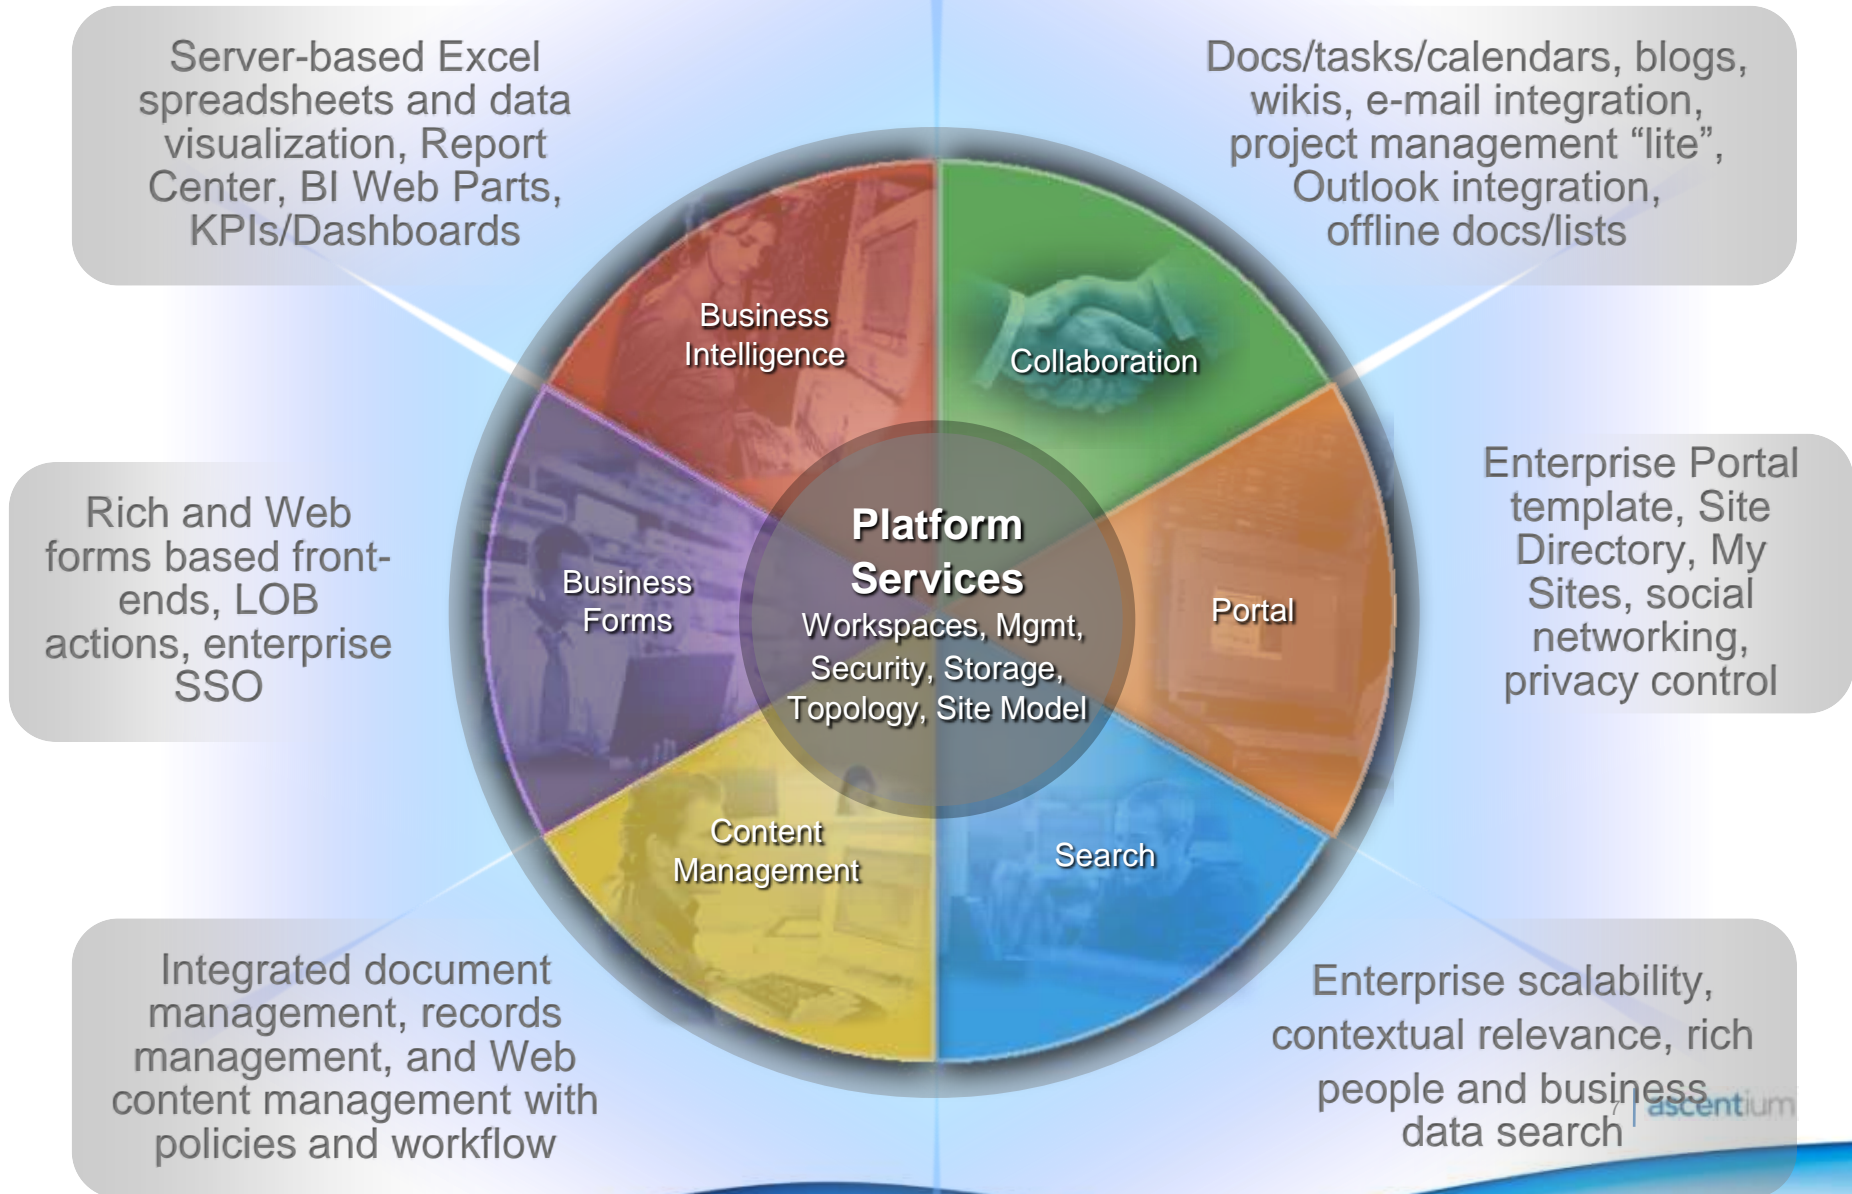

➤ Manage content and processes

- Control documents through detailed, extensible policy management.
- Centrally store, manage, and access documents across the enterprise.
- Simplify Web content management.
- Extend business processes across the organization.

➤ Improve business insight

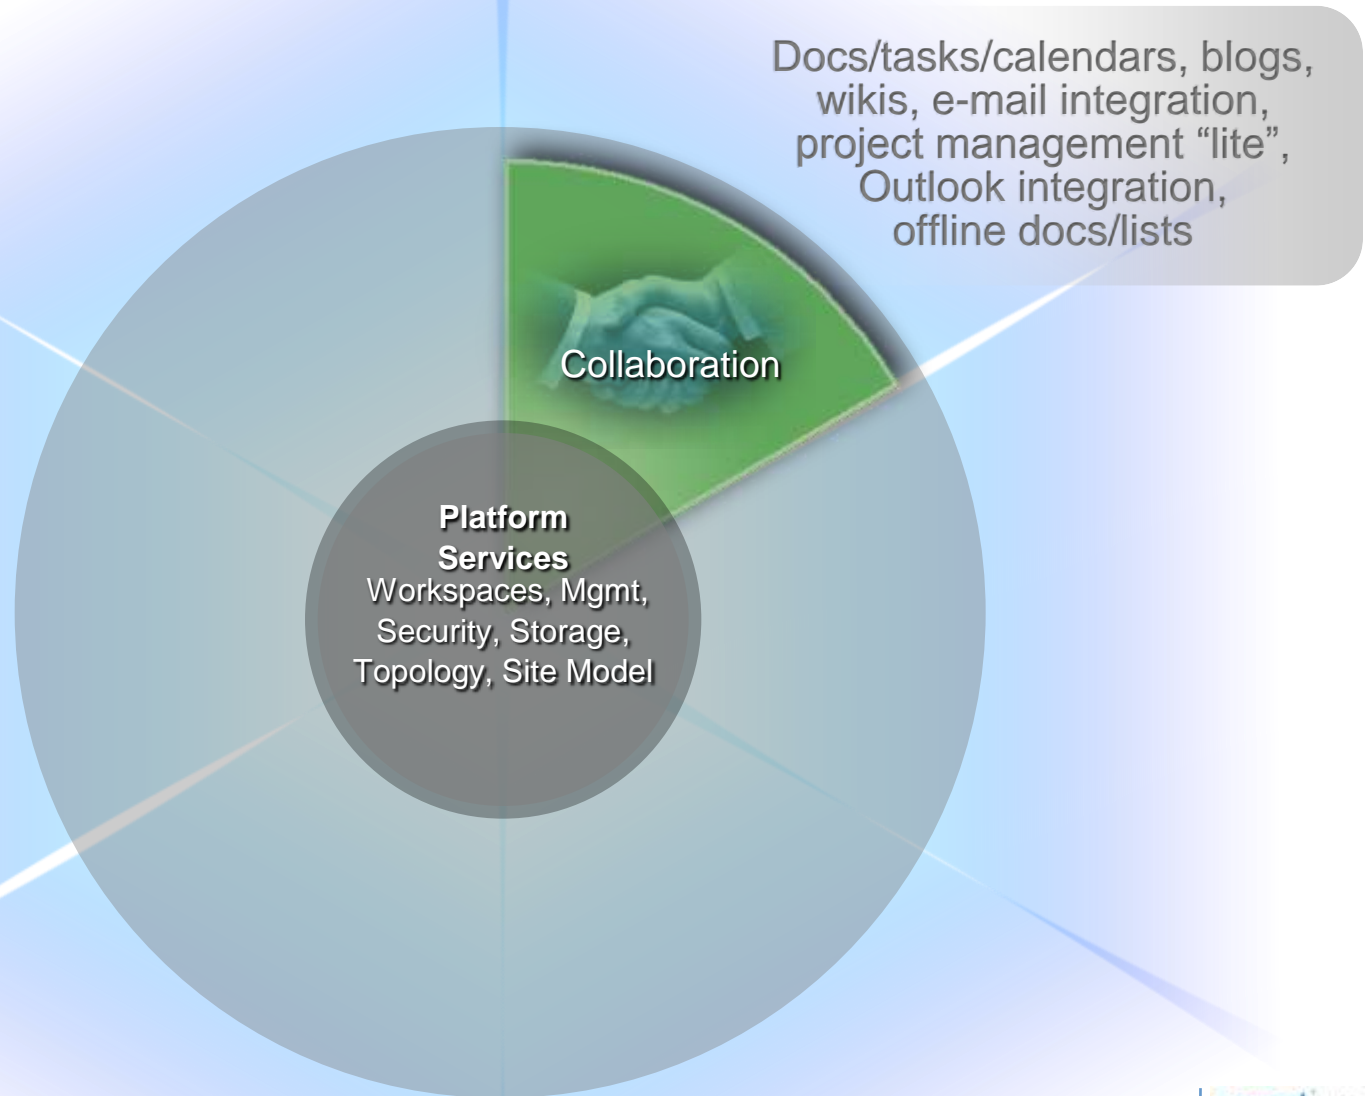

- Present business-critical information in one central location.
- Quickly connect people with information.
- Share business data broadly while helping to protect sensitive information.
- Unlock business data.
- Take advantage of your unstructured business networks to drive better decisions.

Microsoft Office SharePoint Server 2007

Microsoft Office SharePoint Server 2007

Collaboration

Empower Teams Through Workspaces

Common infrastructure to meet a variety of business needs

Collaboration

Support diverse team structures across organizations

Serve variety of authoring and information sharing styles

Keep workgroups informed, accessible, and accountable

Secure information and control data integrity

End-user tools for workflow and data-driven applications

A few things our consultants have done with SharePoint 2007...

1. "Request a Bid" and "Contact Us" workflow and forms web applications
2. 2008 Olympics Portal
3. 2012 London Olympics Portal
4. Authorization for Capital Expenditure
5. Banking Merger and Acquisition, Commercial and Real Estate Portal
6. Best Bets Survey System to optimize corporate search system
7. Board Member Portal
8. Budget Planning, Project Planning and Risk Tracking
9. Budget, Planning and Forecast Portals
10. Business And Permitting Portal
11. Case Studies Portal
12. Charitable Giving Internet Portal
13. Christian Outreach Portal

HOW TO: Create a Custom SharePoint Field Control and Field Type

With WSS 3.0 / MOSS 2007 it is now possible to create custom field types and field control. These constructs are exciting in that they can be used to expose complex data types in SharePoint site columns. For example, if you'd like to capture and store structured data such as an address, a social security number or a phone number that is now possible with a few custom code pieces. In fact the default SharePoint fields such as text, lookup and choice all use this same infrastructure to exposes data to SharePoint lists and page layouts.

The field type class is the native field type implementation that is used to create new site columns and list fields.

Help!
Get your questions answer at the top of this page, or you can learn more about wiki sites by clicking Orion Project How Help Center .

Looking to use this wiki site in the Quick Launch. What is a wiki site? Wikiwiki means quick in Hawaiian. A wiki site is a Web site in which users can easily edit any page. The site grows organically by linking existing pages together or by creating links to new pages. If a user finds a link to an uncreated page, he or she can follow the link and create the page. In business environments, a wiki site provides a low maintenance way to record knowledge. Information that is usually traded in e-mail messages, gleaned from hallway conversations, or written future.
Keep tabs on paper can instead be recorded in a wiki site, in context with similar knowledge. Other example uses of wiki sites include brainstorming ideas, collaborating on designs, creating an instruction guide, gathering data from ideas for the field, tracking call center knowledge, and building an encyclopedia. Future of knowledge. Orion .

Microsoft Office SharePoint Server 2007

Portal Solutions

Customer pains on information management are twofold

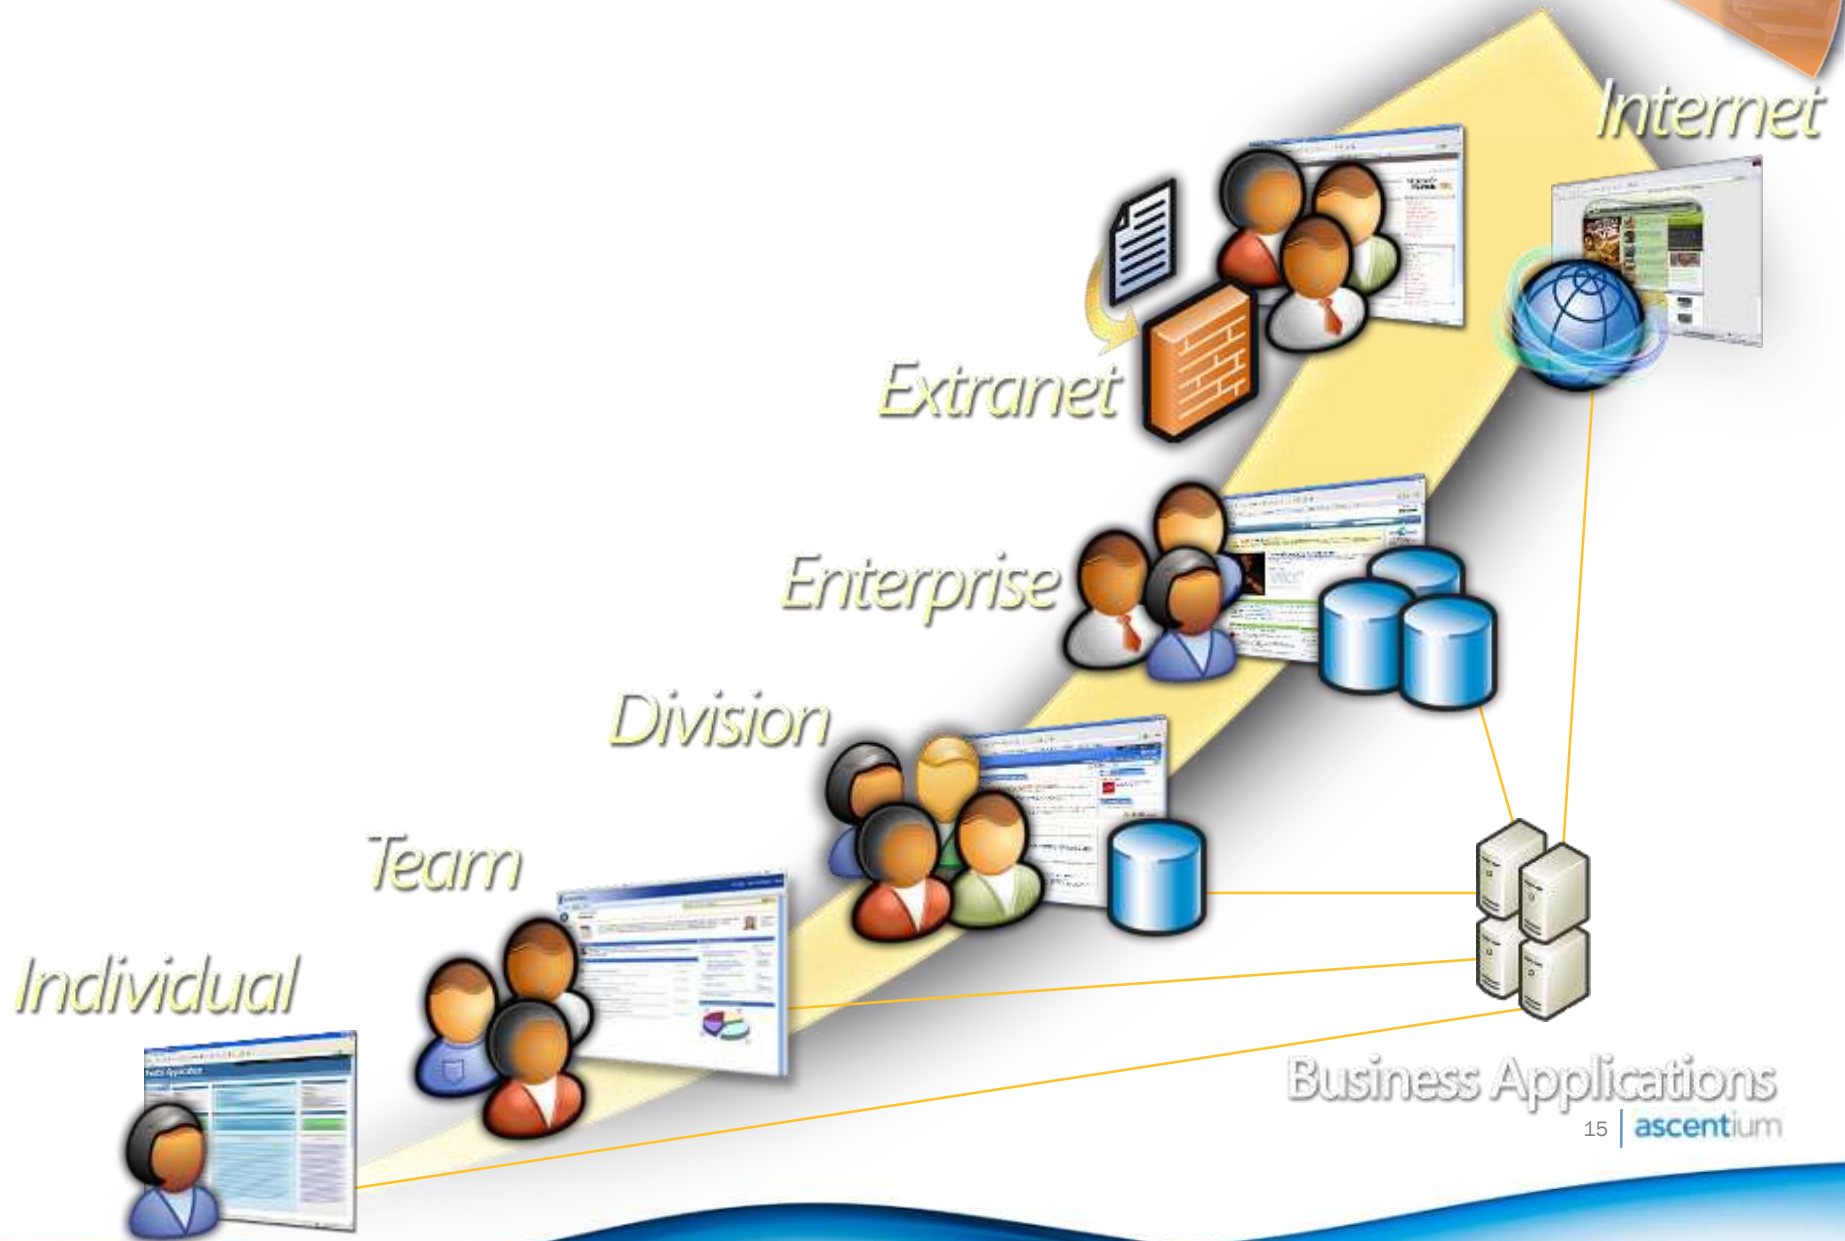

BillG on Search and Information Management at 2006 CEO Summit

“The problem, really, is twofold.

The first is information overload. Faced with the endless deluge of data... how can we hope to keep up? ... how can we stay focused on the tasks that are most important..?

The other problem is... information underload. We’re flooded with information, but that doesn’t mean we have tools that let us use the information effectively.”

SharePoint – A single platform for getting the right information, to the right people at the right time.

All About Orion

We're definitely heads down in launch activities for Orion. Lots of good progress lately around some key decision areas like pricing and messaging in our ads and PR. I'm lucky to have a great team working with me on the launch process and think we're in great shape for a successful rollout.

I've been keeping an eye on the news and a few blogs to get a sense of what the market will think of the product when we launch.

6/9/2005 Clinical Trials Agreement (#1304W-P)

CLINICAL TRIALS AGREEMENT

INTRODUCTION

Contoso recognizes the importance of the pharmaceutical industry in the clinical development of new anti-cancer agents. Contoso wishes to foster collaboration with industry whenever possible. As part of its mission to improve cancer care, Contoso shares with industry the important goal of defining the contribution of a new drug or biologic in the treatment of cancer. Contoso therefore recognizes and supports the need of a private sponsor to focus at the appropriate time on clinical trials which lead to a New Drug Application (NDA) or a Biologics License Application (BLA) since an NDA and a BLA, once approved, are the vehicles through which new anti-cancer therapies become widely available to cancer patients. Thus Contoso considers it appropriate for the investigators sponsored by Contoso to do clinical trials of interest to, and partially supported by a pharmaceutical firm, provided that the trials have scientific merit and are consistent with the overall goals of the investigators and Contoso.

Inasmuch as Contoso coordinates a large volume of clinical research with new anti-cancer agents, industry recognizes Conto's need to be aware of industry's plans for the clinical development of new

State Lands Commissioner Sutherland Establishes
Fidalgo Bay Environmental Aquatic Reserve
Long-term reserve plan protects habitat, supports public use and community involvement

BACKGROUND -- Commissioner of Public Lands Doug Sutherland will launch the new long-term management plan for the Washington's Department of Natural Resources (DNR) has worked with the scientific, environmental and business community. "We must find ways to protect our state's valuable native ecosystems while providing multiple benefits, as envisioned by Sutherland continued, "As scientists and others study and monitor this reserve and its changes, we are going to continue to work with the community. The Fidalgo Bay acquisitions came from the Coastal Protection Fund through the Skagit Land Trust that purchased the property. This Fidalgo Bay plan identifies the characteristics and numerous natural resource assets of this ecosystem, as well as the importance of the Puget Sound Partnership to help clean up and restore Puget Sound. The Aquatic Reserve Program is one of many foundational programs that meet DNR's long-term management objectives. Aquatic reserves as part of DNR-managed state aquatic lands. State Aquatic Reserves are one part of DNR's approach to enhance the health of the aquatic ecosystems that the agency manages.

About 68,000 acres of tidelands
6,700 acres of harbor areas
All submerged marine lands below extreme low tide—that's 3,400 square miles of bedlands under navigable waters
About 145,000 acres of submerged lands in freshwater
Doug Sutherland, who administers DNR, is the 12th Commissioner of Public Lands since statehood in 1889.

STATE LANDS COMMISSIONER SUTHERLAND ESTABLISHES FIDALGO BAY ENVIRONMENTAL AQUATIC RESERVE Long-Term Reserve Plan Protects Habitat, Supports Public Use And Community Involvement

BACKGROUND -- Commissioner of Public Lands Doug Sutherland will launch the new long-term management plan for the 650-acre Fidalgo Bay Environmental Aquatic Reserve. He was joined by the Anacortes community, Samish and Swinomish Tribes, oil companies, Marine Resources Committee, Skagit Land Trust, and numerous local citizens. The announcement culminates a long, collaborative effort to define how Fidalgo Bay Aquatic Reserve would be managed into the future.

Washington's Department of Natural Resources (DNR) has worked with the scientific, environmental and business communities and various local interests around the bay to develop the management plan for the aquatic reserve. This new plan will serve as a guide for the continued protection, restoration, monitoring, environmental education and public enjoyment of the aquatic reserve.

"We must find ways to protect our state's valuable native ecosystems while providing multiple benefits, as envisioned in the laws that govern state-owned aquatic lands," said Sutherland. "The Fidalgo Bay reserve proposal went through rigorous scientific examination under the program criteria. Each reserve plan is a blend of environmental guidelines, customized to the local ecology and the community, as well as benefitting all the people of the state. I believe that engaging the local and broader communities in the planning process gets a better long-term result, even if it takes a little longer, as in the Fidalgo Aquatic Reserve."

Sutherland continued, "As scientists and others study and monitor this reserve and its changes, we are going to continue to learn from this complex Fidalgo Bay ecosystem, and that will help us better manage the bay and similar sites."

The Fidalgo Bay acquisitions came from the Coastal Protection Fund through the Skagit Land Trust that purchased them from local families — the first was a \$350,000 settlement for natural resource damages for the Crowley Barge 101 diesel fuel spill in the area in December 1994. Funding from the second oil spill settlement acquired the additional 82.2 acres of tidelands in 2006.

This Fidalgo Bay plan identifies the characteristics and numerous natural resource assets of this ecosystem, as

Use this page to start a new workflow on the current item or to view the status of a running or completed workflow.

Start a New Workflow

☒ **AFCE Feedback**
Routes a document for review. Reviewers can provide feedback, which is compiled and sent to the document owner when the workflow has completed.

☒ **AFCE Workflow**
Routes a document for approval. Approvers can approve or reject the document, reassign the approval task, or request changes to the document.

Workflows

Select a workflow for more details on the current status or history.

Start "AFCE Workflow": Olympia Greenbelt Land Acquisition

Request Approval

To request approval for this document, type the names of the people who need to approve it on the **Approvers** line. Each person will be assigned a task to approve your document. You will receive an e-mail when the request is sent and once everyone has finished their tasks.

Add approver names in the order you want the tasks assigned:

 **Approvers...** 

☐ Assign a single task to each group entered (Do not expand groups).

Type a message to include with your request:

Please Approve this expenditure so we can bid on the property for sale next to the Capitol

Due Date

If a due date is specified and e-mail is enabled on the server, approvers will receive a reminder on that date if their task is not finished.

Give each person the following amount of time to finish their task:

2 Day(s)

Notify Others

To notify other people about this workflow starting without assigning tasks, type names on the CC line.

 **CC...** 

CC participants will not be assigned tasks but will be notified of the workflow's starting.
